

Melissa Cursons

Chair

Melissa Cursons graduated from the University of Saskatchewan in 2000 with her B.A. in Psychology and in 2003 with her B.Sc. in Physical Therapy. During her undergraduate clinical experiences, Melissa travelled with a multidisciplinary team to Mozambique to learn and provide services focusing on health promotion. This experience guided Melissa to promote access to paediatric rehabilitation in rural and remote regions of Saskatchewan. Melissa currently works with a comprehensive paediatric team (PT, OT, SLP, ECP, SW & ASD services). This team of publicly funded professionals works in rural Saskatchewan specializing in services for children before entering Kindergarten. Melissa is passionate about providing a team approach to services and providing care that specifically focuses on the family's priorities.

Outside of her work as a Physical Therapist, Melissa is a wife, a mother to two pre-teen boys, photographer, gardener and graduate student.
