

Sally Woodard
Communications Team
- Newsletter

Sally graduated from the University of Western Ontario in 1987 with her BSc in Physical Therapy. Sally's pediatric experience has been with Children's Allied Health Services in Alberta and now with the TREKK program of the East Kootenay's. Both programs provide opportunity to help children from birth to nineteen at home, school and in the community. Working in a rural setting Sally has appreciated the increased opportunities for virtual learning that have occurred during the pandemic. As she has just renewed for her 35th year of membership with CPA, Sally expects her role as Paediatric Division newsletter editor will provide yet another learning opportunity.

Sally loves the flexibility of a career in physiotherapy. She has worked in three provinces, urban and rural, private and public, inpatient, outpatient, oncology and for the last 20 years in pediatrics. She has now settled with her partner in Fairmont Hot Springs, British Columbia where they have the privilege of a relaxing and energizing work/life balance.
