Volunteers Needed for a Research Study

Exploring the Experiences and Perceptions of Research Role-emerging Placements in Physiotherapy

Objectives:
1. To explore why graduates chose to participate in a research role-emerging placement during their entry-to-practice physiotherapy program.
2. To describe graduates’ experiences during their placement.
3. To explore graduates’ perceptions regarding if and how participation in a research role-emerging placement impacted their career and professional development.

Participant Inclusion Criteria:
- Must have graduated within the last 10 years from a Canadian entry-to-practice physiotherapy program.
- Must have participated in a research role-emerging placement.
  - At least 50% of time in placement spent pursuing research activities which may include: reviewing research literature, developing research protocol, conducting data collection, conducting data analysis, scientific writing, or dissemination of research findings.
- Must be able to participate in an interview in English.

Time Requirement:
- One short introductory phone call to discuss the interview (10-15 minutes).
- One interview up to 1 hour in length over the phone or Zoom (a web-based platform).

Additional details:
- Email should only be used for general communication about the study. Please do not send any confidential health information over email.
- Participation in this study is strictly voluntary.
- Please contact the research team for more information if you or anyone you know may be interested in participating in this study!
